Subject: CA Proposition 65

Re: Enclosures and Accessories made with ASA, ABS and PC resins from New Age Enclosures

Dear Customer,

Regarding the full product catalog by New Age Enclosures and the State of California Proposition 65 reporting requirements and list dated August 11 2023.

Acrylonitrile butadiene styrene (ABS)

While the monomers of acrylonitrile, butadiene, and styrene; components in ABS, are listed separately on California's Proposition 65 list of chemicals that it has determined cause cancer and/or reproductive effects, the copolymer Acrylonitrile butadiene styrene (ABS) is not listed.

Acrylonitrile styrene acrylate (ASA)

While the monomers of acrylonitrile and styrene; components in ASA, are listed separately on California's Proposition 65 list of chemicals that it has determined cause cancer and/or reproductive effects, the copolymer Acrylonitrile styrene acrylate (ASA) is not listed.

Polycarbonate (PC)

While the monomer Bisphenol A (BPA), a component in Polycarbonate (PC), is listed separately on California's Proposition 65 list of chemicals that it has determined cause cancer and/or reproductive effects, the polymer of Polycarbonate (PC) is not listed.

The information provided in this letter is derived from industry standards, practices and the manufacturer's data and is, to the best of my belief and knowledge, accurate as of the date written.
